Address – Giza, Egypt

Professional Statement

Passionate DevOps Engineer with a strong interest in designing scalable, secure, and reliable cloud platforms. I enjoy building automation-driven infrastructure, improving deployment workflows, and creating efficient systems that enable development teams to deliver software with confidence. My experience spans cloud infrastructure, Infrastructure as Code, CI/CD, containerization, Linux administration, and observability, with a continuous focus on improving system reliability, security, and operational excellence. I effectively leverage AI-powered tools to enhance productivity, accelerate research, automate repetitive tasks, and support technical decision-making while maintaining a strong understanding of the underlying technologies and engineering principles. Currently expanding my expertise in cloud architecture, distributed systems, platform engineering, and modern infrastructure design, with a commitment to continuous learning and building practical, business-focused solutions.

Languages

- Arabic – Native
- English – Intermediate

Technical Skills

- Cloud Platforms (AWS, GCP)
- Infrastructure as Code (Terraform, Ansible)
- CI/CD & GitOps (Jenkins, GitHub Actions, GitLab CI/CD, ArgoCD)
- Containerization & Orchestration (Docker, Kubernetes, Amazon ECS)
- Linux Administration (Ubuntu, CentOS, Amazon Linux)
- Python(Boto3, os) and Bash Scripting
- Web Technologies (HTML, CSS)
- Databases & SQL (MySQL, Basic SQL Queries)
- IT Operations & Technical Support
- Version Control (Git, GitHub, Git Bash)
- Monitoring, Logging & Observability (CloudWatch, Prometheus, Grafana, Loki)
- Networking (TCP/IP, DNS, VPC, LB, SG)
- Configuration Management (YAML, JSON)
- Application Stack (NGINX, Tomcat, MySQL, RabbitMQ, Memcached)
- System & Infrastructure Architecture Diagrams
- Generative **AI** Fundamentals

Soft Skills

- Documentation Skills
- Problem Solving
- Analytical Thinking
- Attention to Detail
- Decision-Making
- Team Collaboration and Independent Work
- Communication and Presentation Skills
- Ownership & Accountability
- Time Management
- Troubleshooting & Root Cause Analysis
- Communication Skills
- Adaptability and Continuous Learning

Projects

DEVOPS / DEVSECOPS / GITOPS PLATFORM ON AWS 2026 -October

- Designed a **multi-repository DevOps platform** integrating **Terraform-based AWS infrastructure**, **GitHub Actions CI/CD**, and **Amazon EKS**.
- Built an application **CI pipeline** using **Maven**, **Checkstyle**, and **SonarQubeQuality Gates** for automated builds, testing, and **code quality analysis**.
- Integrated **Docker image** building, **Trivy vulnerability scanning**, and **Amazon ECR** publishing with commit-based image tagging.
- Configured **Helm charts** and **Argo CD** manifests to support **GitOps-based Kubernetes deployment** and application state reconciliation.
- Configured **Kubernetes Ingress** with **AWS Load Balancer Controller** annotations and **AWS Certificate Manager(ACM)** integration for **HTTPS traffic management**.
- Troubleshot **CI/CD** and **GitOps integration issues** involving **SonarQube** configuration, **Docker build consistency**, **Git authentication**, and **Argo CD repository and chart-path mismatches**.

TERRAFORM-PROVISIONED CI/CD PLATFORM ON AWS 2026 - April

- Designed and provisioned a complete **AWS** infrastructure using **Terraform**, including networking, **IAM** roles, **ECS** services, **ECR** repositories, **security groups**, and **load balancing** resources.
- Built an end-to-end **Jenkins** Declarative Pipeline triggered by GitHub Webhooks to automate source code checkout, **Maven** builds, unit testing, and application packaging.
- Integrated **SonarQube** Quality Gates, Checkstyle validation, **Docker** image creation, and automated image publishing to Amazon **ECR**.
- Automated application deployment to Amazon **ECS** with Slack notifications, secure **IAM**-based access control, and production-style **CI/CD** workflows.

LIFT & SHIFT MIGRATION – ON-PREM TO AWS 2026 - July

- Designed and implemented a Lift & Shift migration strategy to move a multi-tier application from an on-premises environment to **AWS** while preserving the existing architecture.
- Built a secure **AWS** infrastructure using **VPC**, **Public & Private Subnets**, **Route 53**, Application Load Balancer (**ALB**), **EC2**, **Auto Scaling Groups**, and **IAM** Roles.
- Deployed and managed application components including **NGINX**, Apache **Tomcat**, **MySQL**, **RabbitMQ**, and **Memcached** across multiple tiers.
- Implemented monitoring and operational visibility using Amazon **CloudWatch** while applying networking, security, and high-availability best practices.

Work Experience

Srour Mall

IT Operations & Technical Support

2025 – Present

- Provided technical support to end users and assisted in daily IT operations.
- Diagnosed and resolved basic hardware, software, networking, and system issues.
- Monitored CCTV systems and ensured continuous operational availability.
- Assisted in maintaining IT infrastructure and supporting business-critical systems.
- Performed troubleshooting and incident resolution to minimize service disruptions.

Payroll Operations & Reporting

2024 – Present

- Managed payroll processing and monthly payroll closure activities using Softex ERP.
- Prepared payroll reports and maintained accurate employee records and attendance data.
- Ensured payroll accuracy, data validation, and compliance with internal procedures.
- Generated operational reports using Microsoft Excel to support business decisions.
- Handled confidential payroll information while maintaining data integrity and accuracy.

CCTV Operator

2024 – Present

- Monitored and operated CCTV surveillance systems across multiple locations.
- Identified, documented, and escalated security incidents according to company procedures.
- Maintained surveillance records, incident reports, and operational documentation.
- Performed basic troubleshooting of CCTV equipment and network connectivity issues.
- Collaborated with IT and security teams to ensure system availability and operational continuity.

Education

BACHELOR OF ARTS (BA) – Helwan University
Major: Arabic Language and Literature

2023 – Present

Courses and Certificates

Decoding DevOps – Advanced Projects with AI — DevOps-focused course covering AWS, Docker, Kubernetes, GCP, GitHub Actions, ArgoCD, GitOps, Terraform, monitoring, and AI.

LFS162: Introduction to DevOps & Site Reliability Engineering – covered DevOps, SRE, CI/CD, IaC, Kubernetes, cloud infrastructure, and observability.

LFS158: Introduction to Kubernetes – covered Kubernetes architecture, cluster management, Minikube, application deployment, container orchestration, networking, and storage.

LFS101: Introduction to Linux – covered Linux CLI, system administration, networking, shell scripting, and security

AWS Cloud Practitioner – Course Completed – covered AWS fundamentals, core services, security, networking, storage, and cloud best practices.

AWS Solutions Architect – Associate – Course Completed – covered AWS architecture, VPC, EC2, IAM, S3, RDS, ELB, Auto Scaling, networking, security, and high availability.

Cloud GreenOps for AI – covered AI sustainability, GreenOps principles, token optimization, caching, batching, and model selection.

Claude 101 – covered prompting, responsible AI usage, AI capabilities and limitations, NLP, conversational AI, and human+AI collaboration.

AI Fluency: AI Capabilities & Limitations – covered generative AI, large language models, AI safety, responsible usage, and practical applications.
